

Jovian Color Picker Pricing Sheet

Bulk Pricing

The current price of a Jovian license is \$25. However, a discount is given when purchasing more than one (1) license of Jovian, the amount of the discount is directly related to the number of licenses purchased. e.g. Two licenses would garner a 2% discount, 10 licenses equals a 10% discount, and so on, up to 40% for 40 or more licenses.

Bulk licenses can all use the same license key data, or have a unique key per-license if requested.

Site License Pricing

A Site License allows Jovian to be installed and used on any number of machines, and used by any number of people, within the registered organization.

The cost of a Site License is \$750 (seven-hundred and fifty).

License Usage

Just as with a personal license, the bulk licenses are applied per-person (e.g. employee using Jovian). Instead of per-computer.

This allows the employee to use Jovian on any of the organization's computers that they typically use throughout their work day.

All Jovian licenses, personal, bulk and site, are valid for any of the past, current and future Jovian branded products on any of the supported platforms.
